

SVE Truck Attachment

SVE Truck Attachments - Svetruck started in the year 1977, designing a durable, reliable and service-friendly forklift. When they started that year the company had a clear vision of the kind of business they would like to be and the types of products they wanted to produce. Svetruck specializes in manufacturing lift trucks which allow the operator to perform efficiently within challenging surroundings. Svetruck believes that being capable of doing safe and successful material handling in the best way possible really helps in order to contribute to a constructive working environment.

Their facility in Ljungby is home to the making of container handlers and log- stackers as well as forklifts. At present, Svetruck is proudly supplying forklifts worldwide.

Svetruck stays focused on the future and is still devoted to maintaining their strong status for reliability and durability. Their basic approach to high quality, solid experience and more than 30 years of knowledge in the field, means they can provide people exceptional solutions for all of their material handling needs.
