Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest expanding forklift business in the North American market, thanks to their reliability in retaining a high degree of consumer service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division located in Cleveland has a professional team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a nationwide equipment expansion venture. Early product sales of this industrialized equipment focused on large business communities, the armed forces and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Daewoo began the first home-based forklift business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of substantial expansion of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling industry. This project greatly expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a modern plant which helped set up the company for the fabrication of high added-value goods suited for export. In 1993, the company had a global sales network and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
